

Sheikh Fahmida Zaman

ML & AI Researcher | Web Developer

Email: fahmidajothy123@gmail.com | GitHub: github.com/fahmidajothy123-bit | LinkedIn: linkedin.com/in/fahmida

PROFILE

I am a passionate Machine Learning and AI Researcher with a strong foundation in building intelligent systems. Alongside my research work, I love creating beautiful and responsive websites using modern web technologies. I have developed multiple modern and fully responsive web projects using HTML, CSS, Tailwind CSS, and JavaScript. This combination of AI expertise and frontend development skills allows me to build both intelligent backends and elegant user interfaces. Open for collaborations, research projects, internships, and AI-based development opportunities.

RESEARCH WORK

Fake News Detection using RoBERTa and Enhanced Graph Convolutional Networks

Ongoing Research Project • 2026

Developing a hybrid framework that combines contextual embeddings from RoBERTa with Enhanced Graph Convolutional Networks (EGCN) to capture semantic and relational information for improved fake news detection accuracy.

NLP • RoBERTa • Graph Neural Networks • Deep Learning

PROJECTS

Flower Store Website

A fully responsive flower e-commerce platform with a dynamic product gallery, real-time shopping cart, and secure checkout system, focused on an elegant UI and seamless customer journey.

HTML • CSS • JavaScript • PHP

Hostel Management System

A full-featured hostel management platform handling student registration, room allocation, and fee management, with an admin dashboard for monitoring occupancy and tracking payments.

HTML • CSS • JavaScript • PHP • MySQL

Course Material Management System

An online platform to streamline course material management, assignment submission, and resource sharing between students and faculty, with secure authentication and organized academic workflows.

HTML • CSS • JavaScript • PHP • MySQL

SKILLS

Machine Learning

Scikit-learn, Pandas, NumPy, TensorFlow, PyTorch

Frontend Development

HTML, Tailwind CSS, JavaScript, Responsive Design

Data Mining

Apriori, FP-Growth, Data Visualization, Association Rule Mining
